

Models: VLMOD/VLLCD Backlit Assembly

1. Remove display from packaging.
2. Make 15 pin connection between Program Distribution Panel or wall plate and Display unit. Insure power to VCS-3 system is ON (see note 1).
3. On models VLMOD Backlit Assembly and VLLCD Backlit Assembly a 12 V adapter connection will be made to display only if display is to be placed 400 feet or more from Program Distribution Panel (see note 2).
4. Plug adapter into 120 Vac wall outlet.

Note 1: If there is no power to VCS-3 system, LCD will not display any information. System must be on in order for Display to function properly.

Note 2: In the event adapter becomes disconnected from Display, repeat steps 3 and 4.
